

Time for Care Quality Improvement for Primary Health Care teams

**Fully funded two day programme
5th & 6th February 2020, London- venue TBC**

The Time for Care programme is offering a **fully funded** two day quality improvement programme for Primary Health Care teams.

With the increasing diversity of personnel in primary care we recognise the relevance of improvement skills across different health care professionals. This programme is designed for those working in general practice including pharmacists, paramedics, physiotherapists, occupational therapists, social prescribers and care coordinators.

Delivered by a range of quality improvement specialists including jobbing GPs and practice managers, you will gain an understanding of core quality improvement theory and training in practical tools and techniques, that can be immediately applied within a primary care setting.

Why quality improvement?

- Widely recognised need for improvement within primary care to tackle increasing service pressures with reduced resources.
- Deliver the highest quality of care possible to our patients.
- Helps in the implementation of change: safe, effective and engaging tools.
- Enable Primary Care Network development.

Why this programme?

- Understanding core quality improvement theory.
- Learn and test out key improvement tools and techniques.
- Explore methods of engaging and collaborating within practice and network settings.
- Connect and network with like-minded regional colleagues.

Accommodation is available free of charge for those requiring it however, we are unable to reimburse travel expenses or the evening meal on the first day. Lunch and refreshments will be provided on both days.

Demand is expected to be high so we would encourage you to register as soon as possible. Places will be offered on a first come first served basis. **To request a place complete the online booking form at <https://www.events.england.nhs.uk/events/time-for-care-quality-improvement-for-primary-health-care-teams> by 17/01/2020.**
