

Clinical Systems Training Prospectus

2022/23

About Us

The Clinical Systems Training and Data Quality Team consists of subject matter experts; many have worked in previous roles within the NHS and Primary Care and have a passion for training and development and are able to adapt to individual needs.

We aim to provide CCGs and Primary Care GP Practices with high quality training for new and existing members of staff as well as day to day support and optimisation training to help improve patient care through IT systems.

We provide support directly to the CCG which can include a variety of projects as well providing resources to practices such as user guides, video guides, clinical templates, reports and document templates to help improve data quality.

We also support with the implementation of national services such as GP to GP, EPSR2/4, GP Connect and SCR.

Preparing for Your Remote Training Session

Please ensure that staff are familiar with the use of Microsoft Teams prior to attending the training session.

For the training to be as effective as possible ideally the staff member will need to be in an isolated room, using a computer with a microphone, speakers/headphones and (if possible) a camera. Please let us know if this is not possible, and we can send dial in options within the MS Teams invite so they can participate with the trainer during their training.

On the day of the training we recommend that attendees join the session via the link provided in the invitation, a few minutes prior to the start time in case there are any issues joining the session, this will ensure that the training can start promptly.

A few tips to help you prior to your training.

1. Check your laptop/PC has a working internet connection (if required)
2. Accept the calendar appointment for the booking which contains the MS Teams link and check that you can open your Outlook/NHS Mail portal on the PC/laptop you are using for the training
3. Ensure that you will be able to access MS Teams audio - ideally via a speaker or headphones connected to your PC/laptop, OR you could use a desk phone to call the number in the calendar invite
4. Make sure you have somewhere quiet and undisturbed for the training if possible
5. Then, on the day of training, preferably a few minutes before, go into your calendar and click the link and if required dial in.

New Starter Courses

The new starter sessions provide a basic introduction which are suitable for new staff or those that need a refresher, they may also need to attend some of our other short session courses to cover additional training that may be required depending on their job role.

We recommend that new staff members have received their GP Practice induction and are familiar with their job role prior to attending the course as local processes will not be covered during the training session.

New Starter Session for Admin: 3 Hours

This course is suitable for new Receptionists, Administrators, and Dispensing Staff

- Introduction to SystemOne
 - Logging in/Home Screen Navigation/Logging off
 - Tasks/Notifications/Instant Messaging
 - Patient Search and Patient Record Navigation
- Prescribing – Admin
- Update Patient Demographics
- Print from a Patient Record
- Booking/Cancelling/Amending Appointments
- Adding an admin consultation

New Starter Session for Clinical: 3 Hours

This course is suitable for new GPs, Registrars, Locums, Nurses, Nurse Practitioners, Clinical Pharmacists and Paramedics

- Introduction to SystemOne
 - Logging in/Home Screen Navigation/Logging off
 - Tasks/Notifications/Instant Messaging
 - Patient Search and Patient Record Navigation
- Consultations and Prescribing (Acute and Repeat Prescriptions)
- Using Templates for Data Entry
- Home Visits
- Print from a Patient Record
- Book/move Appointments
- Tasks/Notifications/Instant Messaging

New Starter Session for Non-Prescribers: 3 Hours

This course is suitable for new Health Care Assistants, Social Prescribers and Non-Prescribing Nurses

- Introduction to SystemOne
- Logging in/Home Screen Navigation/Logging off
- Tasks/Notifications/Instant Messaging
- Patient Search and Patient Record Navigation
- Booking/Cancelling/Amending Appointments
- Adding a consultation to include Templates and Quick Notes
