

CALL FOR PARTICIPANTS: RESEARCH STUDY

Are you a primary care healthcare professional (GP, pharmacist, nurse, etc) working in the Wessex area and involved in the care of patients prescribed multiple medications and living with dementia or mild cognitive impairment?

We would be very interested to hear your thoughts about how shared decision-making with patients and/or informal caregivers in relation to deprescribing inappropriate medications could be routinely and safely implemented in primary care.

You will be compensated with a £40 Amazon voucher for your time.

Taking part in the study will involve one research interview via Microsoft Teams.

Please email Cindy Brooks for more details, providing your job role, whether you work in a single or group practice and the Local Authority in which your practice is situated:
c.f.brooks@soton.ac.uk or call 023 8059 5906
