INFECTION PREVENTION AND CONTROL MOOC - OCTOBER 2023

This is an online MOOC (massive open online course) running over 8 weeks, commencing 16th October 2023. Each week, you will access a different learning unit focused on promoting best practice and behaviours in infection prevention. Each unit requires approximately one hour of your time per week.

Successful completion of the course provides you with evidence of 8 hours CPD. Course cost in 2023-24 is £25.

Please register your interest via the following link to secure a place:

Learning unit topics include:

- Principles of infection prevention (Global and local significance of infection, HCAI and antimicrobial resistance. Impact of infection on people/ patients/society)
- Getting evidence into practice and knowing if you are making a difference (Evidence-based practice, sources of evidence, quality of care people expect to receive, standards and guidelines, audit, surveillance and feedback.)
- Behaviour change and the work setting (Behaviour change, how we learn behaviours, influences on behaviour, theories and related examples to infection prevention, workplace culture)
- Leading the way and the Champion role (Leadership approaches and principles with relevance to infection prevention, championing in infection prevention)

Feedback from previous course participants:

"This MOOC is just appropriate as I can access it and learn anytime and anywhere. The quizzes and discussion forums provide an avenue to share ideas and learn from other participants"

"The online platform, course layout and materials are easy to use and accessible"

"I thought the content was just fab. A recap and reminder of what I already knew, but the addition of being able to understand how to put it into practice."
