

Service User Survey

There is new training in learning disabilities and autism that all health and care staff will complete over the next 3 years.

We would like to hear about whether the new training is making a difference to you and whether your experience with health and care services is getting better.

We'd be really pleased if you could help us by answering some questions. These questions will be sent every 6 months so we can hear about any changes in your experience.

Firstly the survey will ask a bit about who you are, and then it will ask you to rate your experience using smiley faces.

1 smiley face would show us you are extremely unhappy with the care you receive

2 smiley faces would show us you are a little bit unhappy with the care you receive

3 smiley faces would show us you are not happy or unhappy with the care you receive

4 smiley faces would show us you are happy with the care you receive

5 smiley faces would show us you are extremely happy with the care you receive
