

Clinical Systems Training

Latest updates

Welcome to the April issue of our Clinical Systems Training newsletter. In this monthly publication we will share updates, hints and tips on clinical systems as well as details of forthcoming training opportunities.

EMIS-X

EMIS-X is the new cloud-based technology platform designed to enhance and expand upon the capabilities of the existing EMIS Web product.

Following the success of their previous webinars demonstrating the capabilities of EMIS X, EMIS have scheduled an additional webinar to provide users with an opportunity to see the new functionality.

You can register for a place on the webinar [here](#)

SystemConnect

Following user feedback TPP have published 4 new questionnaires that can be used for SystemConnect. These questionnaires will form part of the default configuration when you enable SystemConnect. For more information please visit [here](#)

Hints and tips

1 Do you know about the SystemOne Quick Launcher

Whilst in a patient record, you can press F12 on your keyboard to open the quick launcher and set up shortcuts to your favourite clinical templates.

2 Are you registered for EMIS Now?

You can find help and support for the EMIS Application by visiting the EMIS Now webpage [here](#) and registering for an account.

3 SystemOne Time Savers - Scanning

Check out TPP's new series of 'Time Savers,' designed to help you save time using SystemOne.

A new episode is released every Wednesday and episode one covers Scanning.

The video can be found [here](#)

Training availability and booking

We run regular training for new starters – on both EMIS and SystemOne – that is tailored to the person's role, including whether or not they are a prescriber.

[Click here to find available sessions for new starters](#)

We still have availability on the following bespoke training sessions this month. [Email us](#) for more details.

Mon 8 April	Tues 9 April	Mon 15 April
EMIS Short Session (AM)	Intro to S1 Optimisation (AM)	SystemOne Short Session (PM)

Did you know... We have an annual Clinical Systems Training Prospectus click here
